

## JOURNEY OF A COMPANY FROM AN EDUCATIONAL SITE TO AN ECOMMERCE PLATFORM

### BUSINESS NEED:

- Migrate from an old and cumbersome ecommerce platform to a new ecommerce site
- Offer top-class experience to site visitors, while managing a host of content assets
- Ensure new platform is more scalable and flexible
- Include new features which improved online shopping experience
- Optimize the deliverance of its new responsive site
- Integration with third-party platforms
- Avail the most cost-effective migration solution
- Optimized for use in different parts of the world

### BUSINESS SOLUTION:

- To address the business needs, Demandware's cloud-based e-commerce solution and AEM's web content management system were selected to deliver an intuitive experience to the customer.
- Content migration, refinement of workflows and development of user interfaces to Demandware and AEM were undertaken and completed
- Retained uniformity of new and old content assets
- Implemented features in the website, specific to the customer's business needs, such as custom search, choice of payment methods, language selection etc.
- Responsive web design supporting various devices
- Integration with third-party platforms like Google Analytics

### BUSINESS BENEFITS:

- Combination of Demandware and AEM makes the complete workflow and implementation very flexible and user friendly.
- Release cycle time has reduced significantly, enabling software releases in less than 3-6 months' timeframe.
- Significant increase in the client's ecommerce sales.
- Ability to expand to international markets
- Increase in online traffic and revenue.
- Improvement across all KPIs

### TECHNOLOGY ENABLERS:
